

OCEANSIDE ART GLASS™
VOL. 2

Twenty-seven years ago, Oceanside Glass & Tile® started making glass.

Styles change, colors trend, and the Team embarks every new day to turn your recycled bottle glass into marvelous mosaics. With serendipity only a Magic 8 ball might be able to predict, Oceanside Glass & Tile now makes glass for the world its founders pioneered.

For the glass blowers, fusers, stained and mosaic artists; for the hobbyists and master craftspeople alike; for the creators, the imaginers, and those who make life a little more colorful.

In our second Glass Catalog, we stand in awe of how full circle life can be. In sometimes unpredictable ways, we all come back to our roots. Thank you for welcoming us back.

It feels good to be home.

Founders Boyce Lundstrom, Sean Gildea, Don Pettey, and Jon Stokesbary.

Using this Catalog

Transparency Values

As you use this catalog, you'll find the glass is organized first by color and then by opacity within each color. Opacity is a measure of how much or how little light can pass through a sheet of glass. We define opacity in the following ways:

Transparent Products - Light can easily pass through these 100% transparent glasses since they don't contain any opaque glass or other light blocking material, such as metallic flakes in Aventurine glasses. Formerly known as Cathedral Products.

Translucent Products - These mixed products are predominantly transparent glass with some opaque glass mixed in, allowing light to pass through in many or most areas.

Semi-Translucent Products - Predominantly opaque glass with some translucent glass mixed in, allowing less light to pass through the sheet or pass through in only small areas.

Opalescent Products - Glasses that are primarily or completely opaque, reflecting most light away but often featuring a luminescent glow when backlit depending on the specific product.

Additional Descriptions - Also shown within each color group are other sub-groups, such as Thin, Thick, Iridescent, and any others that apply.

After the main color grouped section of the Product Catalog, you will find the same sheet glass images grouped by their product family or style. More information about each product family can be found starting on page 22.

GLASS FAMILIES

The products in this section are duplicates of the products previously identified in the first portion of the catalog. Grouping glass in to colors and opacity level is extremely useful, however many of our glasses also belong within families that contain similar products. Knowing the full extent of these families can also be useful in glass work. Here you can view all the products contained within each of the various family groups.

WATERGLASS®

Our Waterglass is a natural surface texture created by stretching the hot glass sheet while it is still pliable. The result is gentle, rolling waves that resemble the surface of a lake or stream — it can only be created using the Continuous Ribbon process.

BAROQUE™

Our Baroque is a modern version of hand-blown "reamy" antique glass. By slowly stirring together glasses of carefully mismatched compositions, we create a dimensional swirling texture that is unique in each sheet.

SOLID OPALESCENT

Opalescent glass is mostly opaque, yet can sometimes display a muted, luminescent glow when backlit (varies by product.)

OPALART™

The hypnotic OpalArt family is defined by magnificent swirls of color created when disparate glasses meet and freeze for all time.

NON-TEXTURED SOLID TRANSPARENT

Non-textured solid transparent colors are a staple in any glass studio.

SPIRIT™

Mouthblown glass qualities in sheet glass form — nothing else approaches this celestial explosion of sweeping color.

TEXTURED SOLID TRANSPARENT

Textured solid transparent colors can add movement and depth to your work.

ARTIQUE®

Artique is a re-creation of the spirit and character of mouthblown antique glass. The very subtle texture is scribed into the glass surface while the sheet is still extremely hot and pliable.

PEARL OPAL

The striking, multi-color blends in our Pearl Opal family promise a unique combination of rich luminescence and perfect light transmission. The unmistakable Pearl glow dances beautiful in concert with subtle Corsica texturing.
